

Plugin Compatibility

Richard Rosenman plugins *should* work with:

- Adobe Photoshop CS, CS2, CS3, CS4
- Adobe Photoshop (Version 3 or higher)
- Adobe Photoshop Elements
- Adobe PhotoDeluxe
- Adobe Illustrator (Version 7 and higher)
- Adobe ImageReady (Version 2 and higher)
- ArcSoft PhotoStudio (Version 5.5 and higher, but the preview doesn't work correctly)
- CDH Image Explorer Pro (Version 4 or higher)
- CiEBV Photoline 32 (Version 5 or higher)
- Corel Bryce (Version 4 and higher)
- Corel Draw (Version 6 or higher)
- Corel Paint Shop Studio / Pro (Version 9 and higher)
- Corel PhotoPaint (Version 6 and higher)
- Corel/Metacreations Painter (Version 6 and higher)
- Deneba Canvas (Version 6 or higher)
- Equilibrium DeBabelizer Pro (Version 5 and higher)
- FixFoto 2.79
- Gimp 2.2.8
- Image Factory 2.78 (Colour-Science)
- imageN (Freeware from <http://www.pixoid.com/>)
- IrfanView (Version 3.85 and higher, Freeware from www.irfanview.com)
- Jasc Paintshop Pro (Version 4.12 or higher)
- KnowledgeAdventure HyperStudio (Version 4.2 and higher, but no color selection dialogs)
- Macromedia Freehand (Version 7 or higher)
- Macromedia Fireworks (Version 2 or higher)
- Mediachance PhotoBrush
- Megalux Ultimate Paint (Version 2 or higher)
- Megalux Ultimate FX (Freeware from <http://www.ultimatepaint.com/ufx/>)
- Microfrontier Digital Darkroom (Version 1.2 or higher)
- Micrografx Picture Publisher (Version 8 or higher)
- Microsoft Image Composer (Version 1.5 and higher, but dragging the preview isn't possible)
- Microsoft PhotoDraw 2000
- Microsoft Picture It! Digital Image Pro (Version 7 and higher, but a 100% zoom may not work correctly)
- Newave Chaos Fx: Twilight'76 (Version 1.2 or higher)
- PhotoFiltre Studio
- Picmaster (Version 1.25 and higher)
- Plugin Commander Pro (Version 1.5 and higher)
- QFX (Version 7 or higher)
- Right Hemisphere Deep Paint
- Satori PhotoXL (Version 2.29 or higher)
- Serif PhotoPlus (Version 7 and higher)
- SigmaPi Pixopedia 24 (Version 1.0.5 and higher)
- SigmaPi NiGulp (Version 1.5 and higher) (Freeware from www.sigmapi-design.com/freeware.htm)
- Stoik ImageMan Pro (Version 5 and higher)
- ThinkTank Ameri-Imager (Version 2 and higher)
- Ulead Gif Animator (Version 4 or higher)
- Ulead PhotoImpact (Version 4 or higher)
- WebSuperGoo Achroma
- Xara X
- XnView (Version 1.70 and higher) (Freeware from www.xnview.com)

Richard Rosenman plugins *have not* been tested, but *should* work with:

- Ability PhotoPaint Studio
- Adobe PageMaker (Version 6 or higher)
- Adobe LiveMotion
- BananaSoft TwistedPixel
- CADlink SignLab (Version 5 and higher)
- Corel/MetaCreations Painter 5.5
- Corel/MetaCreations Art Dabblor
- Corel Photo House (Version 2 or higher)
- Corel Xara 2 / Xara X
- DigisoftDirect ImagePro 2K1
- Equilibrium DeBabelizer Pro (Version 4.5 or higher)
- Fractal Design Detailer
- Macromedia Director (Version 6 or higher)
- MGI PhotoSuite (Version 4 or higher)
- Newtek Lightwave (Version 5.6 or higher)
- Newtek Inspire 3D
- NewTek Aura (Version 2 or higher, but probably not animatable)
- PM Imagic
- Ulead PhotoExpress (Version 2 or higher)

Richard Rosenman plugins *do not* work with:

- Adobe After Effects (5.0 and higher)
- Adobe ImageStyler (Doesn't support filter plugins)
- Adobe Premiere (Up to Version 5.1: Renders only black to image)
- ArcSoft PhotoStudio 2000 (Up to Version 4.1: Does not support PhotoShop plugins)
- Datatech ImageMan (crashes when dragging preview)
- Discreet 3D Studio MAX (Background image isn't displayed)
- Discreet Combustion (plugin loads but displays incorrect color)
- Macromedia xRes (Crashes on loading plugin)
- Metacreations Painter 5 (Everything works except final rendering)
- Microsoft Image Composer 1.0: (Does not recognize the plugin)
- SPG ColorWorks: Web (Up to Version 4: Everything works except final rendering)

If you have successfully or unsuccessfully tested any of my plugins on software not listed here, please notify me at richard@richardrosenman.com.
